Advances in Equine Orthopaedic Therapies & Regenerative Medicine
(One Day CPD)

Thursday 21st September 2017

Dr Marc Koene Dr.Med.Vet
Jonathan Anderson BVM&S DipACVS MRCVS
Ben Anghileri BVetMed MRCVS
Rachel Read DVM MRCVS

at Oakham Veterinary Hospital
Ashwell Road, Oakham, Rutland, LE15 7QH

This one day course has been designed for equine clinicians who have a working knowledge in the field of orthopaedics and wish to increase their knowledge and practical skills in treating equine tendon, ligament and joint disease. Orthopaedic therapies will be discussed via an evidence-based approach, the speakers will explain their personal views on these modalities including some of the latest products available and especially how they use them as part of their daily clinical routine. There will be group participation and a wet lab session covering ultrasound guided injections, injection points for various treatments, scanning techniques, use of class IV therapeutic lasers and how to harvest bone marrow or adipose tissue.

Turn over to read more about our speakers and see the back page for the outline schedule (7.5 hours of CPD). Cost per delegate £295 + VAT.

“Very good format, very enjoyable and learned lots”

WET LAB
Receive individual training on scanning and injection techniques plus demos on harvesting adipose and bone marrow

“Probably the best one-day CPD ever!”

Leading veterinary orthopaedic treatments

www.nupsala.com
Dr Marc Koene
Dr.med.vet.

Marc Koene is one of the owners of Tierklinik Lüsche, a 30-vet equine practice situated in the northern part of Germany. They run satellite clinics in Hamburg, Bratislava, Moscow, Shanghai and the Netherlands.

After his study of veterinary medicine in Germany, Marc undertook internships in the US and started a Residency program in Kentucky. Back in Germany he boarded as Equine Veterinary Specialist. Marc is the team Veterinarian for Equestrian Sports (DOKR) of the German dressage team and Team USA eventing when they are in Europe. Furthermore he is an International Equestrian Federation (FEI) veterinarian and got his certificate as Chiropractor (IAVC, IACV certificated). Being active in a lot of research projects, he recently entered the veterinary scientific board of the International Association of Laser Therapy.

Jonathan Anderson
DVM MS DACVAA DAAPM
American Specialist in Equine Surgery

Jonathan Anderson graduated from the University of Edinburgh in 2000. He worked at Rainbow Equine Hospital in North Yorkshire and the San Luis Rey Equine Hospital in Southern California before completing a large animal clinical fellowship at Oregon State Veterinary Teaching Hospital and an equine surgical residency at The University of California, Davis. He remained as a staff clinician at UC Davis before returning to Rainbow in September 2009 to further develop surgery and diagnostic imaging at the hospital. He has particular interests in arthroscopic and laparoscopic surgery, CT and cervical disease including the stabilisation of CVM cases.

Ben Anghileri
BVetMed MRCVS

Ben graduated from the Royal Veterinary College in London in 2002. He worked for 4 years in mixed practice in Lincolnshire; enjoying the small animal surgery and gradually building up the equine side of the practice. He joined Oakham Veterinary Hospital in January 2008 after spending a year travelling the world and working in Australia. Ben enjoys most aspects of equine work but is particularly interested in foot lameness and diagnostic imaging and currently runs the Oakham MRI and scintigraphy units.

Rachel Read
DVM MRCVS

Rachel is a Sports Horse Clinician at Rossdales Equine Diagnostic Centre and offers a mobile veterinary service specialising in orthopaedics, acupuncture and optimising sport horse performance. She has completed an internship at the Royal Veterinary College, followed by a period working in the RVC Diagnostic Imaging Department and has spent time in working with Robrecht Cnockaert in ambulatory sports horse practice, primarily dealing with performance issues in showjumpers. Rachel is an FEI treating veterinarian.
Schedule for the Day

08:30 – 09:00  REGISTRATION, COFFEE & PASTRIES

09:00 – 09:45  Imaging of common conditions affecting the lower limb: ultrasound, radiography, MRI etc.
Ben Anghileri BVetMed MRCVS

09:45 – 11:00  Tendon and ligament injuries of the lower limb: treatment strategies (surgical management, use of biologicals and other treatments), prognosis and rehabilitation (what to look for in the after care)
Jonathan Anderson BVM&S DipACVS MRCVS

COFFEE BREAK

11:15 – 12:15  Conditions affecting the equine joint and PAAG gel as a novel therapy for chronic OA cases, including prognosis
Dr Marc Koene Dr.Med.Vet

12:15 – 13:00  Clinical use of the FP4 high power multifrequency laser in tendon and ligament injuries
Rachel Read DVM MRCVS

13:00 – 13:45  LUNCH

13:45 – 14:45  Interactive group session:
In groups of five each team will be given a number of cases to work up from notes and imaging provided. Groups will have time to formulate a treatment strategy and then present to all and discuss.

14:45 – 17:30  Practical rotation (including coffee break in between):
Hands-on practical sessions with the chance to interact with speakers, discuss treatment strategies, have a go yourself and practice various techniques for:
- Scanning and imaging of tendons, ligaments and joints
- Tendon, ligament and joint injection technique
- Bone marrow aspiration and adipose harvesting technique
- Use of the FP4 & InnerX class IV therapeutic lasers

CPD: 7.5 hours
Cost: £295 + VAT
Booking: Online at www.nupsala.com

N.B. The organisers reserve the right to alter this schedule or the speakers if deemed necessary. Furthermore, the organisers reserve the right to limit delegates to one per practice if the event is over-subscribed.

“Very well organised, really enjoyed the discussions and a chance to practice techniques on live and dead examples.”

Leading Veterinary Orthopaedic Treatments

For Dogs & Horses

We have sourced the ‘best in market’ when it comes to veterinary orthopaedic treatments. Our biological products offer a significant improvement in outcome for horses and dogs with joint disease or tendon and ligament injury. Join other clinicians using this non-palliative, disease modifying approach to combat these conditions and make a real difference to the patient. Use our cost effective mobile lab service to bring all the expertise and equipment to you. In addition to stem cells, PRP, BMAC, SVF and ACS, we have superior quality HA, polyacrylamide hydrogel, oral NSAID products and class IV therapeutic lasers to complement your treatment strategy.
